

ISO14001-2004 – Environmental Policy Statement

Precision Printing has made a conscious policy decision to explore appropriate avenues open to it to ensure that care of the environment is a key consideration in all the company's work practices, processes and methods of operation.

Through measurement and examination of the impact of its own activities the company seeks to eliminate or reduce pollution released to the environment. Precision is committed to implementing responsible environmental practices through the implementation of an environmental management system in compliance with legislation. There are no other requirements to which Precision subscribes, in the event that they arise, such requirements will be discussed and agreed by the Directors

Because Forests Matter, Precision is FSC certified and can provide a valid chain of custody for print production on materials approved by the Forest Stewardship Council - Promoting Responsible Forestry.

It therefore accepts that it has a social and moral responsibility. To this end, Precision have embarked on a substantial programme of action which falls into two main categories:-

1. The introduction of a comprehensive programme of on-site working practices that actively discriminates in favour of the environment.
2. Developing a product range using specialist materials and processes that provides a product for our clients which is environmentally responsible, allowing print to maintain a key role in their communications.

Plans and systems of work are designed and maintained to prevent environmental incidents and accidents. Precision endeavours to select environmentally compatible and recyclable material in connection with the manufacture of its products.

A priority of the company is the elimination or minimisation of waste at source and the recycling or re-use of materials.

The transport of our product and the transport and disposal of our waste is carried out with due regard to environmental considerations. The areas of company activity mentioned above have been specifically targeted by the company as being the most important in the efforts to achieve continual improvement of overall environmental performance. These activities are translated into objectives and targets that are regularly reviewed by the management and published to members of staff via email, notice boards.

A copy of this Environmental Policy is available to every member of staff and is available to members of the public on request or via the website www.precisionprinting.com.
